TECHNICAL SKILLS

Programming & Data Analysis
Python · pandas · matplotlib

Quantum Computing
Qiskit · Cirq

Bioinformatics & Molecular Design
Benchling · SnapGene

Tools & Platforms
GitHub · Hugging Face

CERTIFICATIONS & TRAINING

QSummer '26 Quantum Programming Summer School
2026 · Participant
Hands-on quantum programming with the Qiskit and Cirq frameworks.

BTK Academy
Online technical coursework.

RESEARCH INTERESTS

- Computational Biology
- Bioinformatics
- Quantum Algorithms
- Machine Learning
- Space Biology
- Synthetic Biology
- Regenerative Medicine & Tissue Engineering

PROFILE

Second-year Molecular Biology and Genetics student at Nevşehir Hacı Bektaş Veli University, building a computational skill set in bioinformatics, machine learning and quantum programming to analyze complex biological systems and high-dimensional biological data. Undergraduate researcher in multidisciplinary R&D teams working on space biology and regolith detoxification, with growing interest in regenerative medicine, cellular engineering and tissue engineering. Motivated to advance computational biology by combining bioinformatics with emerging quantum algorithms.

EDUCATION

B.Sc. Molecular Biology and Genetics
2025 – Present

Nevşehir Hacı Bektaş Veli University · Nevşehir, Türkiye
Second year (Sophomore)

RESEARCH & PROJECT EXPERIENCE

TUA Astro Hackathon · Turkish Space Agency
Regional 2nd Place

Team Member · Team ÇAKIN · AYRA Project

- Researched lunar regolith composition, water-ice detection and surface conditions to inform an autonomous rover route-optimization system.
- Managed biological and geological data analysis within a multidisciplinary, software- and engineering-focused team.

TEKNOFEST Biotechnology Innovation Competition

Undergraduate Researcher, Team Member · Team CRISTAR · TerraGenesis Project

- Contributed to synthetic-biology design workflows in Benchling for the biological detoxification of Martian regolith.
- Helped draft the project's initial technical reports.

SCIENCE COMMUNICATION

Bioinforange Platform
Current

Video Content & Media Coordinator

- Direct media workflows and design educational video strategies for national bioinformatics content.
- Plan and coordinate tasks across the content team.
